IN THE HIGH COURT OF JUDICATURE AT PATNA
Cr.Misc. No.22275 of 2008
BABLOO MANJHI
Versus
STATE OF BIHAR
---

3. 29.7.2008 Heard.

The petitioner is alleged to have committed rape along with another accused. The plea is that there was no sign of rape as per the Annexure at page-23 of the petition which is the medical repot which indicates that the report was issued two months after the examination of the lady and the date of occurrence. That could probably explain the non-finding of any sign of rape upon the lady. Besides, the lady was married also.

Regard being had to the facts and circumstances of the case, I do not find any merit in this petition which is dismissed.
